PROFESSIONAL SUMMARY

Mobile Application Developer with professional experience building and improving Flutter applications, currently working on a fintech product at Tubali Digital. Experienced in Flutter, Dart, Firebase, REST APIs, authentication, databases, and application architecture, with hands-on experience redesigning security-critical flows such as account activation and PIN resets and migrating verification from email links to OTP-based flows. I also developed Safetify, a real-time crowdsourced incident-reporting application as my undergraduate thesis, which I am now extending into research on on-device AI and model compression. Alongside development, I have founded and led a small technical team and taught web and mobile development to early-career learners through practical bootcamps.

TECHNICAL SKILLS

Mobile & Frontend: Flutter, Dart, Android SDK, React.js, HTML, CSS, JavaScript, Mobile UI/UX optimization

Backend & APIs: Python (Django, Django REST Framework), Node.js, RESTful API design and integration

Data & Cloud: PostgreSQL, Supabase, Firestore, Firebase (Auth, Cloud Messaging, Functions, Hosting), real-time data pipelines

Tools & Practices: Git/GitHub, Agile/Scrum, CI/CD, Google Maps API, Cloudinary

PROFESSIONAL EXPERIENCE

Mobile Application Developer — Tubali Digital, Kano State (Remote) *Sep 2026 – Present*

- Redesigned critical security flows in Tubali's mobile fintech app, including account activation, login PIN reset, and transaction PIN reset.
- Moved these flows from email-link-based verification to OTP-based verification, cutting down on a recurring source of failed and delayed verifications.

Founder & Technical Lead — Hausasoft Technologies, Kano *Dec 2022 – Present*

- Founded and run a small startup building mobile applications and delivering community digital-skills programs.
- Designed and led a bootcamp teaching web development and cross-platform mobile development to over 200+ early-career learners, handling both the course content and the day-to-day mentorship.

Web Development Trainee (SIWES) — Centre for Information Technology and Development (CITAD), Kano, Nigeria *Nov 2024 – Jul 2025*

- Completed a structured industrial work placement in web development, as part of BUK's Student Industrial Work Experience Scheme (SIWES).
- Collaborated on the development of EventMaster, a modern web application that simplifies event planning and booking by connecting users with venues and trusted service providers in one platform.

FLAGSHIP PROJECT

Safetify: A Real-Time Crowdsourced Incident Reporting & Safety Alert Mobile Application — Undergraduate Thesis, Bayero University, Kano *Nov 2025 – Mar 2026*

Technologies: Flutter, Firebase (Auth, Firestore, Cloud Messaging), Google Maps API, Cloudinary, Three-tier architecture

Links: Repo Link: <https://github.com/AbubakarAbdulrahim/Safetify>, App Link: https://drive.google.com/file/d/1Dhhe9xdak8L-xykDF1D7i1W4JTyKfsaA/view?usp=drive_link

- Built a mobile app, using Kano State as the case study, that lets residents submit geo-tagged incident reports and receive real-time safety alerts for incidents nearby.
- Built an admin dashboard for verifying and clustering incoming reports before alerts go out, and an interactive map of reported incidents.
- Tested the system with six participants across unit, integration, system, and usability tests; it scored 4.4/5.0 on usability and delivered alerts in about 2.1 seconds on average.
- Currently extending the project into a research paper on compressing the detection model (quantization and pruning) so it can run multimodal anomaly detection directly on the phone instead of relying on the cloud.

EDUCATION

B.Sc. Information Technology — Bayero University, Kano (BUK) *Dec 2021 – Mar 2026*

- CGPA: 4.44 / 5.00 (Second Class Honours, Upper Division)
- Thesis: "Safetify: A Real-Time Crowdsourced Incident Reporting and Safety Alert Mobile Application (A Case Study of Kano State, Nigeria)" — Supervised by Murja Sani Gadanya; Faruk Umar Ambursa (HOD)

RESEARCH INTERESTS

Mobile Computing, Mobile Crowdsensing, Edge/On-Device Artificial Intelligence, Model Compression for Resource-Constrained Devices, and Applied Software Systems for Public Safety.

CERTIFICATIONS

- Research Methodology and Scientific Writing — Maryam Abacha American University of Nigeria | Feb 2025
- Introduction to Cybersecurity — Cisco Networking Academy | Dec 2023
- Introduction to Data Science — Cisco Networking Academy | Jan 2024
- Jobberman Soft-Skills Training — Jobberman | Mar 2022
- Web Development Fundamentals — Sololearn | Mar 2022
- Higher Professional Diploma in Data Processing and Information Technology — VIT | Jan 2021

LEADERSHIP & COMMUNITY INVOLVEMENT

- Member, Google Developer Student Clubs (GDSC BUK) *Feb 2022 – Feb 2026*
- Member, Muslim Students' Society of Nigeria (MSSN), BUK Chapter *Feb 2022 – Jan 2026*
- Secretary General, Albarka Group Youth Development Association *Jun 2020 – Sep 2024*

LANGUAGES

- English (Fluent)
- Arabic (Basic)
- Hausa (Native)
